

Inaugural Session

Arvind Sinha, Conference Chairman

“Our invitations to industry authorities in various fields have been well-received.”

I sincerely thank Mr DR Mehta, President, TAI, for giving me this responsibility for making me chairman of this wonderful conference. The concept of this conference is somewhat different. This is not a conference where we discuss high technicalities. In this conference we are talking about various business models, drawing upon future business ideas and the new directions available to the textile industry in the years to come and the possibility of the Indian textile industry leading the world in the coming years.

Our invitations to industry authorities in various fields have been well-received and the result is that today speakers are from various parts of the textile industry. I request participants to make full use of such a gathering of talents from various fields.
