

Inaugural Session

**K. Ramchandra Pillai, CMD,
National Textile Corporation**

“The Indian share in the world textile and clothing industry is going to double.”

The support the textile industry has been getting from Rita Menon for the last 27 months in the form of policy initiatives is unique. We look forward to more such initiatives for the continued growth of the textile industry.

The Indian share in the world textile and clothing industry is going to double. And I see strong growth for denim. I understand it's going to be about 100 million meters. I see a tremendous potential for manmade fibers.

National Textile Corporation is looking for partners who can have joint ventures with us. We are going to invest about Rs 400 crores in technical textiles. We are looking for people who can be joint venture partners in setting up this plant in India in the area of technical textiles.
