"Certifications For the Complete Organic Textile Chain"

Textiles

ecological and organic

Controlled and Certified by Ecocert Greenlife

Organic Textile Certification from The Fibre to the Finished Product

Faced with this mass of specifications, **Ecocert** chose to get involved in an international approach to harmonize standards and adopt the **GOTS** (Global Organic Textile Standard), **OCS** (Organic Content Standard), and **ERTS** (Ecological recycled standard) for the inspection of Ecological & Organic Textile.

The standard integrates all of the textile processing stages, from the fibre to the finished product: the raw fibre must be organic farming certified and all manufacturing process involved must be inspected.

Calm and Cool: Blue can be strong and steadfast. A universal colour, liked by most people! The colour of all things sublime; the oceans, the sky, waterfalls or rivers!

Blue conveys importance and confidence without being somber or sinister, hence the blue power suit of the corporate world and the blue uniforms of the police officers. Long considered a corporate colour, blue, especially darker blue, is associated with intelligence, stability, unity and conservatism.

The blue denim is the one and only colour that has helped homogenize the people of this blue planet!

Be it a deep blue, power blue, or the cool blue of the oceans, Colorband dyes ensure clean and clear blues.
