

*Innovations in Textile Technology and  
Fashion towards Circular Economy*

## About SDC

The SDC is the world's leading independent, educational charity dedicated to advancing the science and technology of colour worldwide. Established in 1884, we have been representing our members and our industry for over 125 years. The SDC is a professional, chartered society. We are also a global organisation, with our Head Office in Bradford UK, we have an international network of regions and activities. We are governed by a Board of Trustees and three Governance Documents - our Royal Charter, By-Laws and Rules. Our mission is to communicate the science of colour in a changing world.

SDC EC (in India) has over the past 10 years successfully organized conferences, which have been well received by the industry for the quality of topics selected. These international conferences create a common platform for information dissemination, bringing together national as well as global personalities & talent for the common good of the coloration industry. India has the maximum number of SDC members outside of the UK, and the increasing influence of India on SDC and the coloration industry, in general, has been acknowledged by all.

## Conference Theme

"As the business goes global the collaboration among various stakeholders of the textile supply chain is becoming eminent. Riding the trend, The SDC EC (India) and Rachana Sansad School of Fashion & Textile Design would join hands to organise The 13th International conference and "**Collezione 2018 - the fashion show**".

The theme of the conference is '**Innovations in Textile Technology and Fashion towards Circular Economy**'

The textile industry is struggling to reduce its footprint and one of the promising pathways to this would be to embrace the concept of the 'Circular economy'. The technology and fashion segments of the textile supply chain can benefit immensely if they work in tandem with each other. The CE targets optimum reuse of the discarded products after their life cycle and the reuse of the waste generated during manufacturing of products. Easier said than done?, and hence intellectuals around the world are toiling to find ways and means to help the textile and apparel industry to find a realistic and profitable solution. At the international conference and the fashion show we jointly attempt to put forward the innovation, ideas and projects that would help everyone involved in the textile supply chain to take a step forward in creating a greener and happier ecosystem for all its living beings."

## Who Should Attend?

The focus for this event, being centered around on Textile Processing it is imperative for every Dyehouse and Processing Industry to attend this event. Be it the Senior Management, the Production Department, Technical/R&D segment or the Purchasing faculty at the Dyehouse, it would be relevant to all to attend.

In addition, the following would also derive immense benefit from attending the event:

- Brands and Retailers
- Buying Houses
- Testing laboratories
- Research Institutes and Students
- Dyestuff and Chemicals Manufacturers
- Textile Machinery Manufacturers
- Fashion Designers
- Textiles student
- Academician

## Tentative Programme

<b>Registration</b>	8.30 am to 9.30 am
<b>Inaugural Session</b>	9.30 am to 10.40 am
9.30 am	Welcome
9.40 am	President Address: Dr Stephen Westland, CCol FSDC, President - SDC
9.50 am	Chief Guest Address
10.00 am	Guest of Honour Address
